## Cyber bullying/ Blackmail and Harassment:

when a child, preteen or teen is tormented, threatened, harassed, humiliated, embarrassed or otherwise targeted by another child, preteen or teen using the Internet, interactive and digital technologies or mobile phones.

**According to one victim,** *“the difference between being bullied at school and being bullied on the internet is that you can not get away from it – cyber bullying follows you, even after you get home from school.”*

# Crimes against and involving children:

## Child Pornography/ Possession, Distribution and Self Production:

- Child pornography is one of the fastest growing businesses online, and the content is becoming much worse. In 2008, Internet Watch Foundation found 1,536 individual child abuse domains. (Internet Watch Foundation. Annual Report, 2008).
- Of all known child abuse domains, 58 percent are housed in the United States (Internet Watch Foundation. Annual Report, 2008).
- The fastest growing demand in commercial websites for child abuse is for images depicting the worst type of abuse, including penetrative sexual activity involving children and adults and sadism or penetration by an animal (Internet Watch Foundation. Annual Report, 2008).

**Enticement/Travel:** conduct, or an attempt or conspiracy to commit such conduct, constituting criminal sexual abuse of a minor, sexual exploitation of a minor, abusive sexual contact of a minor, sexually explicit conduct with a minor, or any similar offense under federal or state law.

- Predators may initiate an offline meeting for sex early in the online relationship or may spend months “grooming” the victim for a sexual relationship.
- When the predator is ready to move the relationship into the physical world, he or she may coax their victims with gifts and other material goods.
- Predators have been known to offer bus or plane tickets and money to entice the child to travel to areas where the predator will have greater control over the child, or they may cross state lines to gain access to a child.

# The Grooming Process

Traditional Grooming  
VS.  
Online Grooming

- Grooming is the process by which an offender draws a victim into a sexual relationship and maintains that relationship in secrecy.
- The grooming sex offender works to separate the victim from peers, typically by engendering in the child a sense that they are special to the child and giving a kind of love to the child that the child needs.

## Victim Characteristics

- Girls ages 14-17 are most likely to be solicited
- Boys ages 14-17 are most likely to experience unwanted exposure to sexual material
- Girls ages 14-17 are most likely to experience online harassment

***What About

- 75% stopped monitoring when a child reached 14 years of age

Parents need to know that *YouTube Kids* is a kid-centric portal to YouTube that features curated TV shows, music, educational videos, and user-created content. There are parental control features in place -- like a timer and a way to disable the search feature -- but the content is still coming from YouTube, so some videos feature kid-targeted ads.
